RESOLUTE NAMED “BEST-IN-CLASS” VENDOR BY MICROSOFT
Microsoft Employees Use Specialty Vendor Program to Find and Select Outstanding Vendors

BELLEVUE, WA – February 1, 2007 – Resolute Solutions Corporation, a world-class consulting firm and Microsoft Gold Certified Partner that leverages software investments for mid-market to Fortune 100 companies with its unique combination of business impact experts and IT specialists, today announced that it has been selected by Microsoft as a "Best-in-Class" Specialty Vendor in the following four categories: (1) Online Design and User Experience; (2) User Segmentation & Satisfaction; (3) Online Technical Planning & Development; and (4) Online Business Intelligence & Analytics. In 2004 Microsoft launched a global CRM agency model that included the Relationship Marketing (RM) Specialty Vendor Program to identify best-in-class suppliers to support Microsoft projects. Since then Microsoft has reduced the approved vendors by more than 90%, making the best-in-class designation in four categories all the more meaningful.

The RM Specialty Vendor Program enables Microsoft to quickly identify pre-approved, best-in-class, specialty-trained service providers that can be recommended to internal Microsoft groups seeking quality assistance. Microsoft uses a rigorous rating system that includes client feedback, in addition to the quantity and quality of work provided in each area, to select best-in-class vendors.

“Achieving best-in-class status in not just one, but four Microsoft service areas, reinforces Resolute’s determined and focused effort aimed at delivering superior quality work that our clients can leverage into bottom line results,” stated John Fallou, Resolute chief executive officer. Fallou added, “This recognition is a testament to our high quality team and the dedicated effort provided on every Resolute project.” Resolute has a history of outstanding performance. Previously Microsoft spotlighted Resolute’s development of a market research management solution as a world-wide, best practices example, to an elite executive board of Fortune 1000 companies.
